BI-LATERAL MEETING – KERCEM & SAN LAWRENZ LOCAL COUNCILS – DWEJRA MASTER PLAN

Minutes

Entity:	**Kercem & San Lawrenz Local Councils**
Date & Time	12th February 2021. Started 11.00am
Venue:	Online (Microsoft Teams)
	Noel Formosa (NF) - San Lawrenz LC
	Sarah Formosa (SF) – San Lawrenz LC
	Rachel Xuereb (RX) – Adi Associates
	Krista Farrugia (KF)– Adi Associates
	Elena Portelli (EP) – Parks Malta
	Eman Calleja (EC) - Ecologist
Agenda	
1. Introductions 2. Request to record the meeting 3. Presentation	

RX	• We wish to know if you have any work going on in Dwejra, even if it is under the EAFRD funding.
NF	• No, presently we have no projects or work going on and nothing planned. But the water flow is being blocked by waste rubble, so it is flowing from somewhere else and causing damage. So, we need to do something to return the flow to its original path.
RX	• Issues arising in the Catchment are: - As you mentioned, blocked water flow because of the waste rubble - Off-roading - Urban drainage water flow - Problems with access for maintenance and cleaning • Proposed Actions: - Clean up of valley bed - Removal of excavation waste - Clean up of the valley near the quarry - Removal of invasive alien species - Afforestation - Creation of a footpath - Set up of a national green warden service - Set up of a working group to tackle strategic issues at a Catchment level
NF	• There is a lot to be done here and I agree with the idea of afforestation and a footpath, but it would be nice to create some form of

	birdwatching on the way. There was a local bird that frequented that area, so maybe in the right environment it will return.
EC	• The idea of building gabions there will benefit the water course. They will filter the water from sediment that runs down it. They will be ½ metre high and we will have 4 spaced out every 20 metres.
NF	• And when the metal netting corrodes what happens to these gabions?
EC	• It is galvanised so it will last for a very long time. The only maintenance is cleaning up what has been caught up on the side from where the water is flowing.
NF	• Very good. • Is there a way we can include Wied Pisklu? We had proposed to intervene there but ran out of funds. This is one of the only places left where there is a 'migbha' for the bees. The rubble walls there are amazing too. There is an old derelict house there that could be converted into an information centre.
RX	• Did you apply for EU funds for this?
NF	• No, we are talking about 15 years ago, when we wished to do something. There might still be something online, as we had wished to do a Heritage trail there. The application might still exist.
RX	• This sounds very interesting and we can include it in this project.
EP	• Next year we will start the pilot project of Wied ic-Cnus. The installation of gabions will begin between Summer 2022 and 2023. This will be like a template to see how things will be done. The other pilot project is in Malta, Wied Speranza.
NF	• The Council is behind you in this project, so if there is anything we can do, please let us know. We will try to educate our constituents about the value of our valley. • One final thing; there is a house near Sta. Lucia going towards the valley that belongs to the government. This could be used for the education of children on the valley, or showing how an old farmhouse was originally built, or even with local produce in it. It is becoming more derelict as we speak, so the sooner something is done with it the better, before it collapses.
RX	• Send us any information you have; of the things you wish us to consider and we may be able to put them in the Master Plan.
	• End of meeting

Action to be taken	• Circulation of minutes • Presentation
